Aphelele Khambule

Electrical Engineering Student · Backend Developer · Aspiring Cybersecurity Professional

Gauteng, South Africa | aphelelekhambule16@gmail.com | github.com/ApheleleKhambule | linkedin.com/in/Aphelelekhambule

PROFILE

Second-year Electrical Engineering diploma student with six months of hands-on backend development experience on a volunteer web project and certifications in back-end development, IT support and data analytics. Comfortable scripting in Python, Bash and PowerShell. Seeking an internship in cybersecurity, IT or backend development where I can apply a systems-thinking, fault-finding mindset and keep learning.

WORK EXPERIENCE

Backend Web Developer (Volunteer) Jun 2024 – Nov 2024

Independent web project

– Built and maintained server-side features and API endpoints for web applications.
– Wrote and optimised database queries and kept data consistent across the application.
– Found and fixed bugs, tested changes before release and managed code with Git.
– Worked with frontend developers to connect user interfaces to backend services.

EDUCATION

Diploma in Electrical Engineering 2025 – Present

Gauteng City College · Currently in second year

CERTIFICATIONS

Back-End Web Development ALX Africa

Google Data Analytics Professional Certificate Google · Coursera

Google IT Support Professional Certificate Google · Coursera

PROJECTS

Windows & Linux Security Audit Scripts PowerShell · Bash

– Scripts that check for open ports, failed logins, admin accounts, firewall/antivirus status and missing updates, and save a report.

REST API with Authentication Python · Flask · MySQL

– ALX backend project: user sign-up/login and full create, read, update, delete endpoints backed by a relational database.

Bike-Share Usage Analysis SQL · Spreadsheets · Tableau

– Google capstone: cleaned a year of trip data and turned rider-behaviour findings into recommendations.

Personal Portfolio Website HTML · CSS · JavaScript

– Responsive portfolio with light/dark mode, built with AI-assisted tools and deployed on GitHub Pages.

SKILLS

Languages: Python, JavaScript, Bash, PowerShell, SQL
Backend: REST APIs, relational databases, Git, Linux command line, debugging
IT & security: Networking fundamentals, Windows & Linux administration, troubleshooting, security fundamentals, automation
Data: Spreadsheets, SQL, data cleaning, visualisation
Soft skills: Problem solving, communication, teamwork, self-directed learning, attention to detail
